SRESA's 7th National Conference on

RELIABILITY AND SAFETY

10th & 11th December, 2026

About Conference

The NCRS-2026 theme, "Reliability and Safety for Engineering Excellence," highlights the vital role of dependable and secure systems in national development. Reliability ensures consistent performance, reduces failures, improves productivity, and strengthens confidence in indigenous technologies across sectors such as transportation, healthcare, manufacturing, defense, and infrastructure. Safety protects human lives, equipment, the environment, and national assets through effective design and operation. Engineering excellence promotes innovation, quality, precision, and advanced research to address real-world challenges. Aligned with the vision of Atmanirbhar Bharat, the theme encourages the development of reliable, safe, and indigenous solutions for a stronger, self-reliant India. National Conference on Reliability and Safety (NCRS) has been a major outreach event of SRESA at National Level. It was realized that a reliability and safety event should be organized with at least a periodicity of one year at pan-Bharat level. Six NCRS events have successfully been organized in past 10 years i.e., during years 2014 – 2024. NCRS has become one of the major national events in risk and reliability. 7th National Conference on Reliability and Safety (NCRS-2026) jointly Organized by Department of Mechanical Engineering, UCE(A), O.U. and Defense Research & Development Organization (DRDO) in Association with Society for RELiability and SAFETY (SRESA) from 10th – 11th December, 2026.
